THE ILLUSTRATED PICATRIX

The Classic Medieval Handbook of Astrological Magic

Translated and Annotated by
John Michael Greer and
Christopher Warnock

Illustrated by
Nigel Jackson

Renaissance Astrology
This edition of the Illustrated Picatrix is dedicated to N son of N and consecrated to the 7 Planets.
The Picatrix

Contents

Translators' Introduction 10
The Picatrix in Context 11
The Picatrix and the Necronomicon 13
Picatrix in Practice 15
A Note on the Text 18
Warning and Disclaimer 19

Picatrix

Prologue 22

Book One

Chapter One 26
How you may know your degree in the universe

Chapter Two 28
What magic is and what its properties are

Chapter Three 31
What the heavens are and what their substance is

Chapter Four 32
The general theory and arrangement of the heavens for making magical images

Chapter Five 40
Examples of the theory of images, and of those things needful for making magical images

Chapter Six 52
In what degree everything exists in the universe, and how it is known that man is a lesser world and corresponds to the greater world

Chapter Seven 58
In what degree everything in the universe exists, and many other profound things, hidden by the wise, that we intend to reveal in this book of ours
Chapter One  
How it is possible to learn this science  

Chapter Two  
The images of heaven and their secrets  

Chapter Three  
All the works of the planets, the Sun, and the Moon  

Chapter Four  
The motion of the eighth sphere and the fixed stars  

Chapter Five  
The division of this science among nations, and which part of it each nation possesses  

Chapter Six  
The virtues of images, and by what means they may be had, and how images may receive the powers of the planets, and how works are done by images, and this is the foundation of the science of magic and images  

Chapter Seven  
How to work dialectically in the science of magical images, and what part this ought to have in this science  

Chapter Eight  
The order of natural things, and how they may enter into this science  

Chapter Nine  
Examples of the figures and forms of images that call down the assistance of the planets  

Chapter Ten  
The stones proper to each planet and the formation of figures  

Chapter Eleven  
The images of the faces of the signs and their effects  

Chapter Twelve  
The figures and degrees of the signs and their effects according to the opinion of the Hindus, and how they proceed in the contemplations of this science, and in what manner the virtues of superior bodies are attracted according to the opinions of the same, with notable secrets
The Picatrix

Book Three

Chapter One
The parts of the planets that exist in plants, animals and metals

Chapter Two
Of the parts of the signs in the aforesaid three existences, that is, plants, animals, and minerals

Chapter Three
Of the figures, colors, garments, and incenses of the planets, as well as the colors of the faces of the signs

Chapter Four
Why the secrets of this science may not be understood except a little at a time

Chapter Five
In which is demonstrated the virtue proper to animals and noteworthy things necessary in this science, and how the spirits of the planets are attracted by figures and suffumigations

Chapter Six
The magistery of drawing planetary spirits with natural things, and what a magical image is and how it can have this power

Chapter Seven
Attracting the virtues of the planets, and how we may speak with them, and how their influences are divided among planets, figures, sacrifices, prayers, suffumigations, and propositions; and the state of the heavens necessary to each planet

Chapter Eight
The way of prayer with which the Nabateans used to pray to the Sun and Saturn, and how they would speak to them and their spirits and draw forth their influences

Chapter Nine
How to attract the powers of each planet and the powers of their spirits, naming them according to their parts, and how to accomplish this by speaking their names

Chapter Ten
A demonstration of the confections of planetary spirits, and preventing dangers from ceremonies and effects, and of the wonders of magic, and of the food, suffumigations, unguents, and odors that one who invokes planetary spirits ought to use...

Chapter Eleven
The effects of magical images in diverse things, as well as in alterations of sight,
so that things are seen other than as they are; and causing sleep and waking, and
making poisons and their remedies

Chapter Twelve
Rules Necessary in this Science

Book Four

Chapter One
By what virtue and force spirit proceeds, and what are the properties of spirits,
odies, sense, intellect, and soul, as well as the differences between them

Chapter Two
What vigor the spirit of the Moon brings to this inferior world, and what
ought to be done with each of the seven planets

Chapter Three
What the Chaldeans held to be the profundities and secrets of this science, and
what they said about it

Chapter Four
The images and reasonings that greatly further this science

Chapter Five
The ten sciences that are necessary to this art, and how this science is helped
by them, and what is the foundation of the science of magic

Chapter Six
How the suffumigations of the stars ought to be made, and certain
compositions necessary to this science

Chapter Seven
The things of the magical art found in the book The Chaldean Agriculture
which Abudaer Abemiaxie translated from the Chaldean language into Arabic

Chapter Eight
The virtues of other things which Nature does by her own properties

Chapter Nine
Images whose virtues perform marvels, that were found in a book that was
discovered in the church of Coredib and the book of Queen Folopedre...

The Picatrix

Translators’ Introduction

In an age when such terms as “classic” are the everyday fare of advertising copywriters, it is difficult to know how to introduce a genuine classic of occult literature, but the book you hold in your hands is impossible to describe in any other way. Originally written sometime in the ninth century by an anonymous Arab wizard in North Africa or Spain, and credited in the fashion of the time to the notable Sufi and scholar al-Majriti, it was originally titled Ghayat al-Hakim, “The Goal of the Sage.”

Like so many works of Arabic occultism, it eventually found its way to Europe. It was translated into Spanish and Latin at the court of Alfonso the Wise, King of Castile, in the year 1256, and received the new title of Picatrix. Scholars to this day are uncertain what the name means. The explanation that seems most plausible is that it is the Latin version of an Arabic transliteration—perhaps Buqratis—of a Greek original; it is tempting, though unprovable, to suggest that the name may have been Harpocrates, the Hellenistic Egyptian god of silence and mystery. The Latin text makes the mystery more intriguing by claiming that Picatrix was the name of the book’s author.

The influence of Picatrix on the magical traditions of the western world was immense. Most of the significant scholarly occultists of the late Middle Ages appear to have drawn on it, or on material borrowed from it by other authors. Marsilio Ficino, whose translation of the Corpus Hermeticum launched the Renaissance occult revival, borrowed heavily from it for his pathbreaking Three Books on Life; Heinrich Cornelius Agrippa’s Three Books of Occult Philosophy was even more extensively influenced by Picatrix, and some of the leading figures in the English occult renaissance of the sixteenth and seventeenth centuries—Simon Forman, Elias Ashmole and William Lilly—used it as a primary source for their own magical work. With the end of the Renaissance and the rise of the scientific materialism that dominated seventeenth-century culture, however, Picatrix dropped from sight, and the revival of magic in the western world that began in the middle of the 19th century passed it by. Even today it remains the least known of the major works of western occultism.
