Prologue

Book One
Chapter One
How you may know your degree in the universe
Chapter Two
What magic is and what its properties are
Chapter Three
What the heavens are and what their substance is
Chapter Four
The general theory and arrangement of the heavens for making magical images
Chapter Five
Examples of the theory of images, and of those things needful for making magical images
Chapter Six
In what degree everything exists in the universe and how it is known that man is a lesser world and corresponds to the greater world
Chapter Seven
In what degree everything in the universe exists, and many other profound things, hidden by the wise, that we intend to reveal in this book of ours

Book Three

Chapter One
The parts of the planets that exist in plants, animals and metals

Chapter Two
Of the parts of the signs in the aforesaid three existences, that is, plants, animals, and minerals

Chapter Three
Of the figures, colors, garments, and incenses of the planets, as well as the colors of the faces of the signs

Chapter Four
Why the secrets of this science may not be understood except a little at a time

Chapter Five
In which is demonstrated the virtue proper to animals and noteworthy things necessary in this science, and how the spirits of the planets are attracted by figures and suffumigations

Chapter Six
The magistery of drawing planetary spirits with natural things, and what a magical image is and how it can have this power

Chapter Seven
Attracting the virtues of the planets, and how we may speak with them, and how their influences are divided among planets, figures, sacrifices, prayers, suffumigations, and propositions; and the state of the heavens necessary to each planet

Chapter Eight
The way of prayer with which the Nabateans used to pray to the Sun and Saturn, and how they would speak to them and their spirits and draw forth their influences

Chapter Nine
How to attract the powers of each planet and the powers of their spirits, naming them according to their parts, and how to accomplish this by speaking their names

Chapter Ten
A demonstration of the confections of planetary spirits, and preventing dangers from ceremonies and effects, and of the
wonders of magic, and of the food, suffumigations, unguents, and odors that one who invokes planetary spirits ought to use; and the proper effects, and works that are not done except in appearance

Chapter Eleven
The effects of magical images in diverse things, as well as in alterations of sight, so that things are seen other than as they are; and causing sleep and waking, and making poisons and their remedies

Chapter Twelve
Rules Necessary in this Science

Book Four

Chapter One
By what virtue and force spirit proceeds, and what are the properties of spirits, bodies, sense, intellect, and soul, as well as the differences between them

Chapter Two
What vigor the spirit of the Moon brings to this inferior world, and what ought to be done with each of the seven planets

Chapter Three
What the Chaldeans held to be the profundities and secrets of this science, and what they said about it

Chapter Four
The images and reasonings that greatly further this science

Chapter Five
The ten sciences that are necessary to this art, and how this science is helped by them, and what is the foundation of the science of magic

Chapter Six
How the suffumigations of the stars ought to be made, and certain compositions necessary to this science

Chapter Seven
The things of the magical art found in the book The Chaldean Agriculture which Abudaer Abemiaxie translated from the
Chapter Eight
The virtues of other things which Nature does by her own properties

Chapter Nine
Images whose virtues perform marvels, that were found in a book that was discovered in the church of Coredib and the book of Queen Folopedre; and a description of all the rules necessary in working with magical images
the Picatrix
The third face of Pisces is of Mars, in which you may make an image for a good journey in military activities and for hunting birds and beasts.

This is what is said of the faces that the Indians call decans.

Hermes Trismegistus explains in his book *On Images* how to calculate images for each and every part of the human body and under which face of the signs to make them. Take pure gold and make a seal and write on it the image of a lion, with the Sun in Leo in the first or second face and in the Ascendant or midheaven, and the Moon not in her house, and the lord of the Ascendant not applying to an aspect with Saturn or Mars or separating from them. Bind the seal around the loins or kidneys. I have tested this, and found that one who does this will not suffer thereafter. I have also seen also a doctor use this seal to seal olibanum like wax; and patients that were given the seal in a drink were immediately freed from their illness. I myself have made and sealed pills of goat’s blood according to this method and it worked miraculously. This happens likewise for the sufferings of the other members of the body, according to their manner and form, and the appropriate symbolism of the planets.

I have found another way to do this. Take pure gold, and make a sigil or a lamen in which you engrave the form of a lion while the Sun is in Leo, the Moon aspecting him but not in her rulership, and the lord of the ascendant neither aspecting Saturn nor receding from him. Bind this sigil as above.

**The 12 Signs of the Zodiac**

**Aries.** This figure is a ram with no tongue. Its properties are for all the infirmities of the head. While it may be made when the Sun is in the first or third or fifth degree of Aries, this figure will be of no benefit unless it is made when the Moon is waxing or full. These are the conditions of the figure. Saturn and Mars must be direct, Jupiter is not in Aquarius and Venus is not in Virgo, which is the sign of her fall, and Mercury is not in Taurus; make the figure between the first degree of Aries and the fifth degree of the first face, and do not make it in the second face (they have said elsewhere that the second face

pertains to the eyes and the third to the ears, whence you must pay attention
to the degrees), and when the Sun and Jupiter are completely above the earth;
and make it in the hour of the Sun. Others say that it is good in the day and
hour of Jupiter. And make it from gold and silver to the weight of 7 grains of
common wheat. This is proven.¹⁷⁵

**Taurus.** Its image is placed above the
liver and is for all its infirmities. Make it
in the first face, between the first degree
and the ninth. Let Saturn not be in
Pisces nor the Moon in Scorpio and
make Mars direct, since it ought to cause
great change. Make it in the day and
hour of the Sun, and do not have the Sun
below the earth. Do not make it in the
second face of Taurus, for they say
elsewhere that the second face is for
infirmities of the gall bladder, and the
third face is for infirmities of the windpipe. Make the image in the form of a
bull with a great head, small mouth, and
great eyes. Make it of red bronze.

**Gemini.** Its image is placed upon the
spleen and is for all its infirmities. Make
it from the first degree to the tenth. Let
the Sun be above the earth; and with
Jupiter in Gemini it is much more
powerful because Jupiter diminishes the
spleen. Gemini has two bodies twisted
together, in the form of two men up to
the navel, and from the navel is one
body; and in one hand it holds a staff.

Make it from silver in the day and hour of the Sun and the first face of
Gemini; in the second and third faces, you will find that it damages other
members of the body.

**Cancer.** Its image is placed on the
stomach for all its infirmities. Make it in
the first face and from the first degree to
the fifth; the second face is not assigned
to these infirmities, for it is assigned to
the infirmities of the lower intestine. Be
careful that Saturn and Jupiter are not
retrograde, and that Mars is in Taurus

and the Moon waxing and the Sun is descending (that is after noon) and Leo is above the earth. And do not make it except on Sunday and do not make it except from the first hour until the eighth hour or in the first and the eighth. Make it in gold or silver. Its image is the image of a crab. Be careful that Capricorn is not in the middle house (according to the opinion of the masters of doctrine the middle house is the sixth or eighth house). Taurus should not be in the fourth house; and be careful with these conditions, because all of them are necessary. This image is for the sufferings of colic. If you are able to make it in the night of the Sun and in his hour, it is very good.

Leo. His image is placed over the right kidney and is for all of the infirmities of the kidneys. Make the image in the form of a lion without a tongue, straight and not twisted. Make it in the day and hour of the Sun, from the first degree until the tenth degree of the first face. Let Mars be direct; and if Saturn and Jupiter should be in the same sign, the seal will be useless. If the Moon is in Leo, let it be waxing, and if she is in other signs, have no fear, so long as she is not in the fourth, fifth or sixth houses. Saturn must not be in the eighth house.

Make the seal in gold or silver, and engrave it or stamp it in one blow. Let the weather not be cloudy, and do not make it in the middle of the fifth degree or higher, and let the Sun be above the earth. The second face is assigned to the ribs that are in front of the kidneys, and this is proved. Others say to imprint the image in mastic, when the Sun is in Leo, and when the time comes that it is necessary, soften it for ten days in wine and drink all of it, and it cures all illnesses of the kidneys for a whole year.

The Conciliator said to make these images when the Sun is in the 21st degree of Leo, and let it represent a lion with stones before him. Let them tie this sigil on the lower back above the kidneys. I have also seen physicians stamp olibanum with it like wax; and give the seal in a drink to patients who have kidney troubles, and at once they were cured. I myself have sealed lozenges of goat’s blood, and they worked miraculously.
